## APPRENTICESHIP

### SCHEME OF THE WEEK

Unilever is the name behind some of the world's most recognisable brands. Their extensive apprenticeship programme includes degree level opportunities in areas such as research and development, engineering, business and technology. Applications are now open for 2024 start dates.

Britain has just been announced as the headquarters of the GCAP, a joint venture between the UK, Japan and Italy to develop the next generation of fighter jets. Over 3,000 staff are already employed on the project and this news is expected to lead to many more highly skilled jobs – good news for the many pupils interested in Aerospace Engineering.

Fancy a future as a code-breaker?

GCHQ has just released its Christmas Challenge and is encouraging school pupils to test their problem solving skills.

**More than just a Museum - Insight into Museum Careers**

This insight day will give pupils the opportunity to explore careers at the renowned RAF Cosford museum. You'll get behind the scenes access and discover what's involved in running a successful museum.

Navigating the career landscape can be daunting, whether you're a pupil thinking about the world of work or a parent supporting your child's ambitions. 'Dear InvestIN' is a podcast developed to demystify this journey, providing answers to the most pressing career questions from pupils and their families.

### Genomic Scientists

Genomic scientists are healthcare scientists working specifically in genomics. They bring specialist scientific knowledge and skills to the selection of appropriate tests, the processing of patient samples and the interpretation of test results. They are divided broadly in genetic technologists and clinical scientists who work together to select and then process appropriate tests to treat diseases and illnesses. They will mainly work in the NHS but may also work within the pharmaceutical industry.
