APPRENTICESHIP

SCHEME OF THE WEEK

Vodafone has a wide variety of Apprenticeships at all levels including Degree Apprenticeships. Roles are available in Data Analytics, Software Engineering, Project Management, Networks and Field Engineering. Applications are currently being accepted.

If this week's university event has inspired a new interest or you want to find out more before applying a Taster Course could be a great next step. There are details of many taster courses on the UCAS website where you can search by the subject area and type of course you are interested in.

LEARN ABOUT UNI ON A TASTER COURSE

University Scholarships & Bursaries

There are hundreds of scholarships and bursaries available from UK universities. Scholarships are generally for academic or sporting excellence and bursaries are designed to support those who face particular hardships or challenges. The Scholarship Hub is a good place to start looking for support but also consider approaching your university directly to see if any support is available in your individual circumstances.

STUDY ABROAD

Studying abroad is increasingly becoming an option that pupils at Adams are considering. The first thing pupils should consider is how they will fund their studies as UK Government tuition fee loans can only be used at UK universities. A great place to start your research is with a company called The University Guys who have lots of free resources on their website.

Applications now open

PWC's Virtual Insight Programme provides opportunities to gain lots of valuable skills and explore your career interests and options. Whether you're interested in doing an apprenticeship, going to university or a combination of both. Through interactive sessions, you'll get to experience different business areas such as Audit, Consulting, Tax, Technology and Operations to find out what it means to be an expert in that area.

Theatre Armourer

An Armourer is in charge of the firearms and blades used in a theatre production. They can also be responsible for pyrotechnics (any special effects using heat, light, gas, smoke or sound) and theatrical trickery.

The role involves elements of engineering, pyrotechnics, carpentry and mechanics. Armourers will work on theatre productions but are also required for film and TV productions. They are normally self-employed and require excellent communication skills, good attention to details and the ability to work as part of a team.
