

A-Level Subjects 2024/25

Year	A-levels	Complementary study
Lower Sixth	Three A-levels	One AS-level
Upper Sixth		Extended Project (EPQ)

Students study three A-levels in the Sixth Form at Haberdashers' Adams. They also study one AS-level in the Lower Sixth and the Extended Project Qualification (EPQ) in the Upper Sixth. A very small number complete four A-levels with the fourth A-level being further maths.

The A-level courses are all two-year courses whereas the AS-level courses take one year and are completed in the Lower Sixth. It is not normally possible to "drop" an A-level part way through the Sixth Form. Students also take part in a non-examination lecture programme, which includes guest speakers from outside the school, and an afternoon of sport each week.

Students select one A-level from each of the subject option blocks (Blocks A, B and C) and one AS-level. The blocks have been structured to encourage students to consider a combination of subjects that fits their interests and aptitude. Students must study **three A-levels** (one from each of Blocks A, B and C) and **one AS-level**.

Block A	Block B	Block C	AS block
Biology	Biology	Biology	Art
Chemistry	Chemistry	Chemistry	Classical Civilisation
Physics	Physics	Physics	Drama
Mathematics (2 sets)	Mathematics (2 sets)	Mathematics	French
Business Studies	Economics	Economics	Geology
Computer Science	Design	English Literature	German
History	Religious Studies	Geography	Mathematics
Sociology		Government and Politics	Music
		Psychology	Physical Education
			<i>with optional progression to A-level*</i>
			Further Maths (2 sets)

*Students opting for Further Maths will have the opportunity to continue to A-level provided that they make appropriate progress and that student numbers are sufficient for us to be able to run the course.

Open Afternoons

We hope you can join us for one of our Open Afternoons. These will be held on 22nd, 23rd and 25th January 2024. There is also the option to find out more about the A-levels you are interested in studying through our online presentations which can be viewed on our website here:
