APPRENTICESHIP

SCHEME OF THE WEEK

The Army is the UK's largest Apprenticeship provider. Soldiers can work towards Level 2,3 or 4 qualifications, the equivalent to GCSEs, A Levels or a Foundation Degree. Subjects include engineering, public service, logistics & construction. We will be welcoming the Army to talk to Yr11 pupils about Apprenticeships next week.

Post 16 Options Roadshows

sponsored by
SHREWSBURY
COLLEGES GROUP

Pupils in **Year 11** are strongly encouraged to consider alternative 16+ providers and not just Sixth Form at Adams. Shrewsbury College runs two excellent events attended by a wide range of 16+ providers and they are a great starting point for thinking about the different opportunities available.

Monday 23rd Sept
4-7.30pm

Shrewsbury Cineworld

Saturday 5th Oct
9.30am-12pm

Holiday Inn Telford

iWantToStudyEngineering

Those pupils who are thinking of applying to study **Engineering** (historically the most popular university subject for Adams pupils) should bookmark this site.

It has been put together by academics from the UK's leading universities and will help pupils prepare to make strong application to competitive courses.

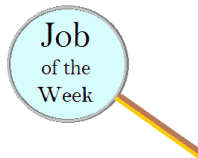

Pupils attending this online event will gain an insight into upcoming work experience, graduate and apprenticeship opportunities with the likes of PwC and benefit from the first-hand advice and tips.

Suitable for pupils in Yr10+ this FREE event offers a complete guide through the medical application journey. Attendees will gain key insights into the medical UCAS application process, connect with doctors and medical students, and gain a clearer view of a future in medicine.

Business Analyst

Business Analysts help an organisation achieve its goals by analysing data, assessing processes and systems, creating solutions and planning for the future. The skills employers will be looking for include analytical & communication skills, the ability to work on your initiative and a problem solving mindset. Competition for business analyst positions is high, so having a degree in a subject that requires analytical and research skills, such as business, economics, maths or computer science is a distinct advantage.
