

CareersInsights

To mark Green Careers Week this edition explores some of the careers that pupils can pursue that will enable them to contribute to protecting our planet.

APPRENTICESHIP

SCHEME OF THE WEEK

If you're passionate about tackling climate change EDF's Apprenticeship programmes offer the opportunity to develop an exciting career whilst helping to create a more sustainable energy future. Applications for 2024 entry will open in January

From journalist to economist, explore some of the many careers in climate change. If you want to work in an area where you can do something positive about climate change, but don't know how, take a look at this selection of videos from people doing these roles and how they go into it.

Geologists will be at the heart of efforts to combat climate change. If you are interested in the natural world around you, are good at investigating and problem solving, are numerate and articulate, have initiative and the ability to work in a team...then a career in Geology could be right for you! Follow the link to explore the wide range of opportunities.

There are many UK space projects that are designed to increase our understanding of the climate challenge we face. One such project is the Biomass mission, which will effectively weigh the carbon contained in forests so we can better understand the role they play in the carbon cycle and how we can protect them.

This video highlights the wide range of exciting green career pathways that can be accessed via an Apprenticeship. Many large employers, including Amazon, have roles focused on helping the company reduce their environmental footprint.

Environmental Engineer

Environmental engineers optimise the use of natural resources, help to develop renewable energy resources and maximise the use of existing materials. They design technologies and processes that control pollution and clean up contamination.

You can become an Environmental Engineer by completing a degree or you could apply for an apprenticeship.

If you have feedback about the careers programme at Adams please [contact me](#).
