Autumn 2025 Issue 3

Join leading local employer JCB at their world headquarters in Uttoxeter for an exciting Open Day designed for future apprentices. You'll get the chance to chat with current apprentices about their journeys, go behind the scenes to see how JCB's world-famous diggers are made, and discover the amazing training and development opportunities available through JCB's learning providers.

This event is a great chance to learn all about PwC's Flying Start degree. It's a university course that includes paid work placements at PwC, giving you real experience while you study. You'll also start working towards your professional qualifications early. It's different from a regular degree because you get hands-on experience during term time, and unlike a degree apprenticeship, you're not employed full-time and still apply through UCAS.

Flying Start degree programmes

Mon 29th Sept 5-6pm

ASTROBIOLOGIST

JOB OF THE WEEK

You've probably heard of an astrophysicist - but what about an astrobiologist? Astrobiologists explore big questions like: Where did life come from? Could it exist elsewhere in the universe? They study biology, planets, and space to search for signs of life on other worlds. To do this, they need a strong mix of science skills—from understanding microbes to knowing how planets form. Astrobiologists often work for organisations like NASA, universities, or research labs.

Want to inspire, challenge and entertain? A career in theatre could be for you! Whether you dream of performing on stage, directing behind the scenes, designing sets or managing productions, there's a role in theatre to match your passion. The Get Into Theatre website is packed with resources to help you explore the wide range of opportunities available - and offers support to help you take the next step toward your future in the arts.
